P R E F A C E .

IN this revision of the Elementary Spelling Book, the chief object aimed at is to bring its notation into a correspondence with that of the recently issued Quarto Dictionary, in which a more extended system of orthoëpical marks has been adopted for the purpose of exhibiting the nicer discriminations of vowel sounds. A few of the Tables, however, and a few single columns of words, are left without diacritical signs as exercises in notation, a familiarity with which is important to all who consult the dictionary. A little attention to the *Key to the Sounds of the marked Letters* will aid both teacher and pupil in this interesting exercise. As it has been found inconvenient to insert the whole Key at the top of the page, as heretofore, frequent reference to the full explanation of the pointed letters on page 14 may be desirable.

In Syllabication it has been thought best not to give the etymological division of the Quarto Dictionary, but to retain the old mode of Dr. Webster as best calculated to teach *young* scholars the true pronunciation of words.

The plan of classification here executed is extended so as to comprehend every important variety of English words, and the classes are so arranged, with suitable directions for the pronunciation, that any pupil, who shall be master of these *Elementary Tables*, will find little difficulty in learning to form and pronounce any words that properly belong to our vernacular language.

The Tables intended for *Exercises* in Spelling and forming words, contain the original words, with the terminations only of their derivatives. These Tables will answer the important purposes of teaching the *manner* of forming the various derivatives, and the distinctions of the parts of speech, and thus

anticipate, in some degree, the knowledge of grammar; at the same time, they bring into a small compass a much greater number of words than could be otherwise comprised in so small a book.

The pronunciation here given is that which is sanctioned by the most general usage of educated people, both in the United States and in England. There are a few words in both countries whose pronunciation is not settled beyond dispute. In cases of this kind, the Editor has leaned to regular analogies as furnishing the best rule of decision.

In orthography there are some classes of words in which usage is not uniform. No two English writers agree on this subject; and what is worse, no lexicographer is consistent with himself. In this book, as in Dr. Webster's dictionaries, that mode of spelling has been adopted which is the most simple and best authorized. The Editor has followed the rules that are held to be legitimate, and has rendered uniform all classes of words falling within them. If established rules and analogies will not control the practice of writers, there is no authority by which uniformity can be produced.

The reading lessons are adapted, as far as possible, to the capacities of children, and to their gradual progress in knowledge. These lessons will serve to substitute variety for the dull monotony of spelling, show the practical use of words in significant sentences, and thus enable the learner the better to understand them. The consideration of diversifying the studies of the pupil has also had its influence in the arrangement of the lessons for spelling. It is useful to teach children the signification of words, as soon as they can comprehend them; but the understanding can hardly keep pace with the memory, and the minds of children may well be employed in learning to spell and pronounce words whose signification is not within the reach of their capacities; for what they do not clearly comprehend at first, they will understand as their capacities are enlarged.

The objects of a work of this kind being chiefly to teach *orthography* and *pronunciation*, it is judged most proper to adapt the various Tables to these specific objects, and omit extraneous matter. In short, this little book is so constructed as to condense into the smallest compass a complete SYSTEM

of ELEMENTS for teaching the language; and however small such a book may appear, it may be considered as the most important class-book, not of a religious character, which the youth of our country are destined to use.

NEW YORK, 1866.

PREFACE TO THE LATEST EDITION.

THE modifications in this revision (of 1880) are not of a character to embarrass those teachers who use the previous editions in the same class. The principal changes which have been made are:

In many instances an improved form of type;

The substitution of living words in the place of those words which have become obsolete;

The omission of orthoëpical marks where they are clearly unnecessary, as explained below;

The correction of a few errors in pronunciation, etc., etc.;

The addition, at the end of the book, of four new pages of common words difficult to spell.

The repetition of the orthoëpical mark has been omitted as needless in a succession of two or more words having the same vowel letter and sound. In such cases only the first word is marked—the marked syllable of this leading word being the key to the corresponding unmarked syllables in the words which follow. But whenever there is a liability to mispronunciation, the right way is indicated by marking the doubtful syllable.

MARCH, 1880.

ANALYSIS OF SOUNDS

IN THE ENGLISH LANGUAGE.

The Elementary Sounds of the English language are divided into two classes, *vowels* and *consonants*.

A *vowel* is a clear sound made through an open position of the mouth-channel, which molds or shapes the voice without obstructing its utterance; as *a* (in *far*, in *fate*, etc.), *e*, *o*.

A *consonant* is a sound formed by a closer position of the articulating organs than any position by which a vowel is formed, as *b*, *d*, *t*, *g*, *sh*. In forming a consonant the voice is compressed or stopped.

A *diphthong* is the union of two simple vowel sounds, as *ou* (äö) in *out*, *oi* (ai) in *noise*.

The English Alphabet consists of twenty-six letters, or single characters, which represent vowel, consonant, and diphthongal sounds—a, b, c, d, e, f, g, h, i, j, k, l, m, n, o, p, q, r, s, t, u, v, w, x, y, z. The combinations *ch*, *sh*, *th*, and *ng* are also used to represent elementary sounds; and another sound is expressed by *s*, or *z*; as, in *measure*, *azure*, pronounced *mëzh'yoor*, *äzh'ur*.

Of the foregoing letters, *a*, *e*, *o*, are always simple vowels; *i* and *u* are vowels (as in *in*, *us*), or diphthongs (as in *time*, *tune*); and *y* is either a vowel (as in *any*), a diphthong (as in *my*), or a consonant (as in *ye*).

Each of the vowels has its regular long and short sounds which are most used; and also certain *occasional* sounds, as that of *a* in *last*, *far*, *care*, *fall*, *what*; *e* in *term*, *there*, *prey*; *i* in *firm*, *marine*; *o* in *dove*, *for*, *wolf*, *prove*; and *u* in *furl*, *rude*, and *pull*. These will now be considered separately.

A. The regular long sound of *a* is denoted by a horizontal mark over it; as, *ān'cient*, *pro-fāne'*; and the regular short sound by a curve over it; as, *căt*, *pă'r'y*.

Occasional sounds.—The Italian sound is indicated by two dots over it; as, bär, fä'ther;—the short sound of the Italian *a*, by a single dot over it; as, fäst, läst;—the broad sound, by two dots below it; as, ball, stall;—the short sound of broad *a*, by a single dot under it; as, what, quād'rant;—the sound of *a* before *r* in certain words like *care*, *fair*, etc., is represented by a sharp or pointed circumflex over the *a*, as, câre, hâir, fâir, etc.

E. The regular long sound of *e* is indicated by a horizontal mark over it; as, mēte, se-rēne'; the regular short sound, by a curve over it; as, mēt, re-bēl'.

Occasional sounds.—The sound of *e* like *a* in *care* is indicated by a pointed circumflex over the *e*, as in thêir, whêre; and of short *e* before *r* in cases where it verges toward short *u*, by a rounded circumflex, or wavy line, over it; as, hēr, pre-fēr'.

I, O, U. The regular long and short sounds of *i*, *o*, and *u* are indicated like those of *a* and *e* by a horizontal mark and by a curve; as, bīnd, bīn; dōle, dōll; tūne, tūn.

Occasional sounds.—When *i* has the sound of long *e* it is marked by two dots over it; as, fa-tigue', marine';—when *o* has the sound of short *u*, it is marked by a single dot over it; as, dōve, sōn;—when it has the sound of *oo*, it is marked with two dots under it; as, mōve, prōve;—when it has the sound of *ö*, it is marked with a single dot under it; as, wōlf, wō'man;—when it has the sound of broad *a*, this is indicated by a pointed circumflex over the vowel; as, nôrth, sôrt;—the two letters *oo*, with a horizontal mark over them, have the sound heard in the words bōom, lōom;—with a curve mark, they have a shorter form of the same sound; as, bōök, gōöd;—when *u* is sounded like short *oo*, it has a single dot under it; as, fūll, pūll; while its lengthened sound, as when preceded by *r*, is indicated by two dots; as in rūde, rū'ral, rū'by.

NOTE.—The long *u* in unaccented syllables has, to a great extent, the sound of *oo*, preceded by *y*, as in *educate*, pronounced ëd'yoo-käte; *nature*, pronounced nāt'yoor.

The long sound of *a* in *late*, when shortened, coincides nearly with that of *e* in *let*; as, *adequate, disconsolate, inveterate*.

The long *e*, when shortened, coincides nearly with the short *i* in *pit* (compare *feet* and *fit*). This short sound of *i* is that of *y* unaccented, at the end of words; as, in *glory*.

The short sound of broad *u* in *hall*, is that of the short *o* in *holly*, and of *a* in *what*.

The short sound of long *oo* in *pool*, is that of *u* in *pull*, and *oo* in *wool*.

The short sound of *o* in *not*, is somewhat lengthened before *s*, *th*, and *ng*; as in *cross, broth, belong*.

The pronunciation of the diphthongs *oi* and *oy* is the same and uniform; as, in *join, joy*.

The pronunciation of the diphthongs *ou* and *ow* is the same and uniform; as, in *sound, now*. But in the termination *ous*, *ou* is not a diphthong, and the pronunciation is *us*; as, in *pious, glorious*.

A combination of two letters used to express a single sound is called a digraph; as, *ea* in *head*, or *th* in *bath*.

The digraphs *ai* and *ay*, in words of one syllable, and in accented syllables, have the sound of *a* long. In the unaccented syllables of a few words, the sound of *a* is nearly or quite lost; as, in *certain, curtain*. The digraphs *au* and *aw*, have the sound of broad *a* (*a* in *fall*); *eo*, that of *u* long, as in *new*; and *ey*, in unaccented syllables, that of *y* or *i* short, as in *valley*.

When one vowel of a digraph is marked, the other has no sound; as, in *cōurt, rōad, slōw*.

The digraphs *ea, ee, ei, ie*, when not marked, have, in this book, the sound of *e* long; as, in *near, meet, seize, grieve*.

The digraph *oa*, when unmarked, has the sound of *o* long.

Vowels, in words of one syllable, followed by a single consonant and *e* final, are long; as, in *fate, mete, mite, note, mute*, unless marked, as in *dōve, gīve*.

The articulations or sounds represented by the consonants are best apprehended by placing a vowel before them in pronunciation, and prolonging the second of the two elements; thus, *eb, ed, ef, eg, ek, el, em, en, ep, er, es, et, ev, ez*.

Those articulations which wholly stop the passage of the breath from the mouth, are called *close*, or *mute*, as *b, d, g, k, p, t*.

Those articulations which are formed either wholly or in part by the lips, are called *labials*; as, *b, f, m, p, v*.

Those which are formed by the tip of the tongue and the teeth, or the gum covering the roots of the teeth, are called *dentals*; as, *d, t, th* (as in *thin, this*).

Those which are formed by the flat surface of the tongue and the palate, are called *palatals*; as, *g, k, ng, sh, j, y*.

The letters *s* and *z* are called also *sibilants*, or hissing letters.

W (as in *we*) and **y** (as in *ye*) are sometimes called *semi-vowels*, as being intermediate between vowels and consonants, or partaking of the nature of both.

B and **p** represent one and the same position of the articulating organs; but *p* differs from *b* in being an utterance of the breath instead of the voice.

D and **t** stand for one and the same articulation, which is a pressure of the tongue against the gum at the root of the upper front teeth; but *t* stands for a whispered, and *d* for a vocal sound.

F and **v** stand for one and the same articulation, the upper teeth placed on the under lip; but *f* indicates an expulsion of voiceless breath; *v*, of vocalized breath, or tone.

Th in **thin** and **th** in **this** represent one and the same articulation, the former with breath, the latter with voice.

S and **z** stand for one and the same articulation; *s* being a hissing or whispered sound, and *z* a buzzing and vocal sound.

Sh and **zh** have the same distinction as *s* and *z*, whispered and vocal; but *zh* not occurring in English words, the sound is represented by *si* or by other letters; as, in *fusion*, *osier*, *azure*.

G and **k** are cognate letters, also **j** and **ch**, the first of each couplet being vocal, the second aspirate or uttered with breath alone.

Ng represents a nasal sound.

B has one sound only, as in *bite*. After *m*, or before *t*, it is generally mute; as in *dumb*, *doubt*.

C has the sound of *k* before *a*, *o*, *u*, *l* and *r*, as in *cat*, *cot*, *cup*, *clock*, and *crop*; and of *s* before *e*, *i*, and *y*, as in *cell*, *cit*, *cycle*. It may be considered as mute before *k*; as, in *sick*, *thick*. **C**, when followed by *e* or *i* before another vowel, unites with *e* or *i* to form the sound of *sh*. Thus, *cetaceous*, *gracious*, *conscience*, are pronounced *ce-ta'shus*, *gra'shus*, *con'shense*.

D has its proper sound, as in *day*, *bid*; when preceded in the same syllable by a whispered or non-vocal consonant, it uniformly takes the sound of *t*, as in *hissed* (*hist*).

F has one sound only; as, in *life*, *fever*, except in *of*, in which it has the sound of *v*.

G before *a*, *o*, and *u*, is a close palatal articulation; as, in *gave*, *go*, *gun*; before *e*, *i*, and *y*, it sometimes represents the same articulation, but generally indicates a compound sound, like that of *j*; as in *gem*, *gin*, *gyves*. Before *n* in the same syllable it is silent; as, in *gnaw*.

H is a mark of mere breathing or aspiration. After *r* it is silent; as, in *rhetoric*.

I in certain words has the use of *y* consonant; as, in *million*, pronounced *mill'yun*. Before *r* it has a sound nearly resembling that of short *u*, but more open; as, in *bird*, *firt*.

J represents a compound sound, pretty nearly equivalent to that represented by *dzh*; as, in *joy*.

K has one sound only; as, in *king*. It is silent before *n* in the same syllable; as, in *knave*.

L has one sound only; as, in *lame, mill*. It is silent in many words, especially before a final consonant; as, in *walk, calm, calf, should*.

M has one sound only; as, in *man, flame*. It is silent before *n* in the same syllable; as, in *mnemonics*.

N has one sound only; as, in *not, sun*. It is silent after *l* and *m*; as, in *kiln, hymn, solemn*.

P has one sound only; as, in *pit, lap*. At the beginning of words, it is silent before *n, s,* and *t*; as, in *pneumatics, psalm, pshaw, ptarmigan*.

Q has the sound of *k*, but it is always followed by *u*, and these two letters are generally sounded like *kw*; as, in *question*.

R is sounded as in *rip, trip, form, carol, mire*.

S has its proper sound, as in *send, less*; or the sound of *z*, as in *rose*. Followed by *i* preceding a vowel, it unites with the vowel in forming the sound of *sh*; as in *mission*, pronounced *mish'un*;—or of its vocal correspondent *zh*; as in *osier*, pronounced *o'zher*.

T has its proper sound, as in *turn*, at the beginning of words and at the end of syllables. Before *i*, followed by another vowel, it unites with *i* to form the sound of *sh*, as in *nation, partial, patience*, pronounced *na'shun, par'shal, pa'shense*. But when *s* or *x* precedes *t*, this letter and the *i* following it preserve their own sounds; as in *bastion, Christian, mission*, pronounced *bást'yun, krist'yan, mikst'yun*. **T** is silent in the terminations *ten* and *tle* after *s*; as in *fasten, gristle*; also in the words *often, chestnut, Christmas*, etc.

V has one sound only; as, in *voice, live*, and is never silent.

W before *r* in the same syllable is silent, as in *wring, wrong*. In most words beginning with **wh**, the *h* precedes the *w* in utterance, that is, *wh* is simply an aspirated *w*; thus *when* is pronounced *hwen*. But if *o* follows this combination, the *w* is silent, as in *whole*, pronounced *hole*.

X represents *ks*, as in *wax*; but it is sometimes pronounced like *gz*; as, in *exact*. At the beginning of words, it is pronounced like *z*; as, in *Xenophon*.

Z has its proper sound, which is that of the vocal *s*; as, in *maze*.

Ch has very nearly the sound of *tsh*; as, in *church*: or the sound of *k*; as, in *character*: or of *sh*, as in *machine*.

Gh is mute in every English word, both in the middle and at the end of words, except in the following: *cough, chough, clough, enough, laugh, rough, slough, tough, trough*, in which it

has the sound of *f*; *hough*, *lough*, *shough*, in which it has the sound of *k*; and *hiccough*, in which it has the sound of *p*. At the beginning of a word, it is pronounced like *g* hard; as in *ghastly*, *ghost*, *gherkin*, etc.; hence this combination may be said not to have a proper or regular sound in any English word.

Ph has the sound of *f*, as in *philosophy*; except in *Stephen*, pronounced *Ste'ven*.

Sh has one sound only; as, in *shall*.

Th has two sounds; whispered, as in *think*, *both*; and vocal, as in *thou*, *this*. When vocal, the *th* is marked thus, (th), as in *thou*.

Sc has the sound of *sk*, before *a*, *o*, *u*, and *r*; as, in *scale*, *scoff*, *sculpture*, *scroll*; and the sound of *s* alone before *e*, *i*, and *y*; as, in *scene*, *scepter*, *science*, *Scythian*.

ACCENT.

Accent is a forcible stress or effort of voice on a syllable, distinguishing it from others in the same word, by a greater distinctness of sound.

The accented syllable is designated by the mark (').

The general principle by which accent is regulated, is, that the stress of voice falls on that syllable of a word, which renders the articulations most easy to the speaker, and most agreeable to the hearer. By this rule has the accent of most words been imperceptibly established by a long and universal consent.

When a word consists of three or more syllables, ease of speaking requires usually a secondary accent, of less forcible utterance than the primary, but clearly distinguishable from the pronunciation of unaccented syllables; as in *su'perflu'ity*, *lit'era'ry*.

When the moon passes between the earth and the sun, we call it new; but you must not think that it is more new at that time, than it was when it was full; we mean, that it begins anew to show us the side on which the sun shines. God ordained the sun to rule the day; and the moon and stars to give light by night.

The laws of nature are sustained by the immediate presence and agency of God.

The heavens declare an Almighty power that made them.

The science of astronomy explains the causes of day and night, and why the sun, and moon, and stars appear to change their places in the heavens.

Air contains the vapors that rise from the earth; and it sustains them, till they fall in dews, and in showers of rain, or in snow or hail.

Grape-vines entwine their tendrils round the branches of trees.

Laws are made to restrain the bad, and protect the good.

Glue will make pieces of wood adhere.

The careful ant prepares food for winter.

We often compare childhood to the morning: morning is the first part of the day, and childhood is the first stage of human life.

Do not postpone till to-morrow what you should do to-day.

A harpoon is an instrument for striking whales.

Monsoon is a wind in the East Indies, that blows six months from one quarter, and then six months from another.

Legislation is the enacting of laws, and a legislator is one who makes laws.

God is the divine legislator. He proclaimed his ten commandments from Mount Sinai.

In free governments the people choose their legislators.

We have legislators for each State, who make laws for the State where they live. The town in which they meet to legislate, is called the seat of government. These legislators, when they are assembled to make laws, are called the legislature.

The people should choose their best and wisest men for their legislators.

It is the duty of every good man to inspect the moral conduct

of the man who is offered as a legislator at our yearly elections. If the people wish for good laws, they may have them, by electing good men.

The legislative councils of the United States should feel their dependence on the will of a free and virtuous people.

Our farmers, mechanics, and merchants, compose the strength of our nation. Let them be wise and virtuous, and watchful of their liberties. Let them trust no man to legislate for them, if he lives in the habitual violation of the laws of his country.

The bright stars without number adorn the skies.

When our friends die, they will never return to us; but we must soon follow them.

God will forgive those who repent of their sins, and live a holy life.

Thy testimonies, O Lord, are very sure; holiness becometh thine house for ever.

Do not attempt to deceive God; nor to mock him with solemn words, whilst your heart is set to do evil.

A holy life will disarm death of its sting.

God will impart grace to the humble penitent.

The lungs are the organs of respiration. If any substance, except air, is inhaled and comes in contact with the lungs, we instantly cough. This cough is an effort of nature to free the lungs.

A finger signifies a taker, as does fang. We take or catch things with the fingers, and fowls and rapacious quadrupeds seize other animals with their fangs.

A pang is a severe pain. Anguish is violent distress.

A lecture is a discourse read or pronounced on any subject; it is also a formal reproof.

THE DOG.

This dog is the mastiff. He is active, strong, and used as a watch dog. He has a large head and pendent ears. He is not very apt to bite; but he will sometimes take down a man and hold him down. Three mastiffs once had a combat with a lion, and the lion was compelled to save himself by flight.

THE STAG.

The stag is the male of the red deer. He is a mild and harmless animal, bearing a noble attire of horns, which are shed and renewed every year. His form is light and elegant, and he runs with great rapidity. The female is called a hind; and the fawn or young deer, when his horns appear, is called a pricket or brocket.

THE SQUIRREL.

The squirrel is a beautiful little animal. The gray and black squirrels live in the forest and make a nest of leaves and sticks on the high branches. It is amusing to see the nimble squirrel spring from branch to branch, or run up and down the stem of a tree, and dart behind it to escape from sight. Little ground squirrels burrow in the earth. They subsist on nuts, which they hold in their paws, using them as little boys use their hands.

FABLE I.

OF THE BOY THAT STOLE APPLES.

An old man found a rude boy upon one of his trees stealing apples, and desired him to come down; but the young saucebox told him plainly he would not. "Won't you?" said

the old man, "then I will fetch you down;" so he pulled up some turf or grass and threw at him; but this only made the youngster laugh, to think the old man should pretend to beat him down from the tree with grass only.

"Well, well," said the old man, "if neither words nor grass will do, I must try what virtue there is in stones;" so the old man pelted him heartily with stones, which soon made the young chap hasten down from the tree and beg the old man's pardon.

M O R A L .

F A B L E II.

THE COUNTRY MAID AND HER MILK PAIL.

When men suffer their imagination to amuse them with the prospect of distant and uncertain improvements of their condition, they frequently sustain real losses, by their inattention to those affairs in which they are immediately concerned.

A country maid was walking very deliberately with a pail of milk upon her head, when she fell into the following train of reflections: "The money for which I shall sell this milk, will enable me to increase my stock of eggs to three hundred. These eggs, allowing for what may prove addle, and what may be destroyed by vermin, will produce at least two hundred and fifty chickens. The chickens will be fit to carry to market about Christmas, when poultry always bears a good

price; so that by May Day I can not fail of having money enough to purchase a new gown. Green!—let me consider—yes, green becomes my complexion best, and green it shall be. In this dress I will go to the fair, where all the young fellows will strive to have me for a partner; but I shall perhaps refuse every one of them, and, with an air of disdain, toss from them.” Transported with this triumphant thought, she could not forbear acting with her head what thus passed in her imagination, when down came the pail of milk, and with it all her imaginary happiness.

FABLE III.

THE TWO DOGS.

Hasty and inconsiderate connections are generally attended with great disadvantages; and much of every man's good or ill fortune, depends upon the choice he makes of his friends.

A good-natured Spaniel overtook a surly Mastiff, as he was traveling upon the high-road. Tray, although an entire stranger to Tiger, very civilly accosted him; and if it would be no interruption, he said, he should be glad to bear him company on his way. Tiger, who happened not to be altogether in so growling a mood as usual, accepted the proposal; and they very amicably pursued their journey together. In the midst of their conversation, they arrived at the next village, where Tiger began to display his malignant disposition, by an unprovoked attack upon every dog he met. The villagers immediately sallied forth with great indignation to rescue their respective favorites; and falling upon our two friends, without distinction or mercy, poor Tray was most cruelly treated, for no other reason than his being found in bad company.

FABLE IV.

THE PARTIAL JUDGE.

A farmer came to a neighboring lawyer, expressing great concern for an accident which he said had just happened. "One of your oxen," continued he, "has been gored by an unlucky bull of mine, and I should be glad to know how I am to make you reparation." "Thou art a very honest fellow," replied the lawyer, "and wilt not think it unreasonable that I expect one of thy oxen in return." "It is no more than justice," quoth the farmer, "to be sure; but what did I say?—I mistake—it is *your* bull that has killed one of *my* oxen." "Indeed!" says the lawyer, "that alters the case: I must inquire into the affair; and if—" "And *if*!" said the farmer; "the business I find would have been concluded without an *if*, had you been as ready to do justice to others as to exact it from them."

FABLE V.

THE CAT AND THE RAT.

A certain cat had made such unmerciful havoc among the vermin of her neighborhood, that not a single rat or mouse dared venture to appear abroad. Puss was soon convinced that if affairs remained in their present state, she must ere long starve. After mature deliberation, therefore, she resolved to have recourse to stratagem. For this purpose, she suspended herself from a hook with her head downward, pretending to be dead. The rats and mice, as they peeped from their holes, observing her in this dangling attitude, concluded she was hanging for some misdemeanor, and with great joy immediately sallied forth in quest of their prey. Puss, as soon as a sufficient number were collected together, quitting her hold, dropped into the midst of them; and very few had the fortune to make

good their retreat. This artifice having succeeded so well, she was encouraged to try the event of a second. Accordingly, she whitened her coat all over by rolling herself in a heap of flour, and in this disguise she lay concealed in the bottom of a meal tub. This stratagem was executed in general with the same effect as the former. But an old experienced rat, altogether as cunning as his adversary, was not so easily insnared. "I don't quite like," said he, "that white heap yonder. Something whispers me there is mischief concealed under it. 'Tis true, it may be meal, but it may likewise be something that I should not relish quite as well. There can be no harm at least in keeping at a proper distance; for caution, I am sure, is the parent of safety."

FABLE VI.

THE FOX AND THE BRAMBLE.

A fox, closely pursued by a pack of dogs, took shelter under the covert of a bramble. He rejoiced in this asylum, and for

a while, was very happy; but soon found that if he attempted to stir, he was wounded by the thorns and prickles on every side. However, making a virtue of necessity, he forebore to complain, and comforted himself with reflecting that no bliss is perfect; that good and evil are mixed, and flow from the same fountain. These briars, indeed, said he, will tear my skin a little, yet they keep off the dogs. For the sake of the good, then, let me bear the evil with patience; each bitter has its sweet; and these brambles, though they wound my flesh, preserve my life from danger.

FABLE VII.

THE BEAR AND THE TWO FRIENDS.

Two friends, setting out together upon a journey which led through a dangerous forest, mutually promised to assist each other, if they should happen to be assaulted. They had not proceeded far, before they perceived a bear making toward them with great rage.

There were no hopes in flight; but one of them, being very active, sprang up into a tree; upon which the other, throwing himself flat on the ground, held his breath and pretended to be dead; remembering to have heard it asserted that this creature will not prey upon a dead carcass. The bear came up and after smelling of him some time, left him and went on. When he was fairly out of sight and hearing, the hero from the tree called out,—“Well, my friend, what said the bear? He seemed to whisper you very closely.” “He did so,” replied the other, “and gave me this good advice, never to associate with a wretch, who, in the hour of danger, will desert his friend.”

BÄR, LÄST, CÄRE, FALL, WHAT; HËR, PREY, THÈRE; ÔET; BÏRD, MARÏNE; LINK;

“Henry, tell me the number of days in a year.” “Three hundred and sixty-five.” “How many weeks in a year?” “Fifty-two.” “How many days in a week?” “Seven.” “What are they called?” “Sabbath or Sunday, Monday, Tuesday, Wednesday, Thursday, Friday, Saturday.” The Sabbath is a day of rest, and called the Lord’s day, because God has commanded us to keep it holy. On that day we are to omit labor and worldly employments, and devote the time to religious duties, and the gaining of religious knowledge.

“How many hours are there in a day or day and night?” “Twenty-four.” “How many minutes in an hour?” “Sixty.” “How many seconds in a minute?” “Sixty.” Time is measured by clocks and watches; or by dials and glasses.

The light of the sun makes the day, and the shade of the earth makes the night. The earth revolves from west to east once in twenty-four hours. The sun is fixed or stationary; but the earth turns every part of its surface to the sun once in twenty-four hours. The day is for labor, and the night is for sleep and repose. Children should go to bed early in the evening, and all persons, who expect to thrive in the world, should rise early in the morning.

No. 150.—C L.

1. *Regular verbs form the past tense, and participle of the past, by taking ed, and the participle of the present tense by taking ing; as, called, calling, from call. The letter p. stands for past tense; ppr. for participle of the present tense; and a. for agent.*

	<i>p.</i>	<i>ppr.</i>		<i>p.</i>	<i>ppr.</i>		<i>p.</i>	<i>ppr.</i>
call	ed	ing	pray	ed	ing	al low	ed	ing
turn	ed	ing	cloy	ed	ing	a void	ed	ing
burn	ed	ing	jest	ed	ing	em ploy	ed	ing
plow	ed	ing	a bound	ed	ing	pur loin	ed	ing
sow	ed	ing	ab scound	ed	ing	rep re sent	ed	ing
plant	ed	ing	al lay	ed	ing	an oy	ed	ing

2. *Monosyllabic verbs ending in a single consonant after a single vowel, and other verbs ending in a single consonant after a single vowel and accented on the last syllable, double the final consonant in the derivatives. Thus, abet, abetted, abetting, abettor.*

	<i>p.</i>	<i>ppr.</i>	<i>a.</i>		<i>p.</i>	<i>ppr.</i>	<i>a.</i>		<i>p.</i>	<i>ppr.</i>	<i>a.</i>
a bet	ted	ting	tor	wed	ded	ding		tre pan	ned	ning	ner

man	ned	ning		cx pel	led	ling	ler	ab hor	red	ring	rer
plan	ned	ning	ner	re bel	led	ling	ler	in cur	red	ring	

3. *Verbs having a digraph, diphthong, or long vowel sound before the last consonant, do not double that consonant.*

	<i>p.</i>	<i>ppr.</i>	<i>a.</i>		<i>p.</i>	<i>ppr.</i>	<i>a.</i>		<i>p.</i>	<i>ppr.</i>	<i>a.</i>
seal	ed	ing	er	claim	ed	ing	er	re coil	ed	ing

oil	ed	ing	er	ap pear	ed	ing	er	a vail	ed	ing	
hail	ed	ing	er	re pcat	ed	ing	er	re strain	ed	ing	er

4. *Verbs ending in two consonants, do not double the last.*

	<i>p.</i>	<i>ppr.</i>	<i>a.</i>		<i>p.</i>	<i>ppr.</i>	<i>a.</i>		<i>p.</i>	<i>ppr.</i>	<i>a.</i>
gild	ed	ing	er	dress	ed	ing	er	re sist	ed	ing	er
long	ed	ing	er	paint	ed	ing	er	con vert	ed	ing	er
watch	ed	ing	er	charm	ed	ing	er	dis turb	ed	ing	er

5. *Verbs ending in a single consonant, preceded by a single vowel, the last consonant or syllable not being accented, ought not to double the last consonant in the derivatives.*

	<i>p.</i>	<i>ppr.</i>		<i>p.</i>	<i>ppr.</i>		<i>p.</i>	<i>ppr.</i>
bi as	ed	ing	lev el	ed	ing	grav el	ed	ing
bev el	ed	ing	coun sel	ed	ing	grov el	ed	ing
can cel	ed	ing	cud gel	ed	ing	par al lel	ed	ing
car ol	ed	ing	driv el	ed	ing	jew el	ed	ing
cav il	ed	ing	du cl	ed	ing	kern el	ed	ing
chan nel	ed	ing	e qual	ed	ing	la bel	ed	ing
chis el	ed	ing	gam bol	ed	ing	lau rel	ed	ing

lev el	ed	ing	ri val	ed	ing	mod ei	ed	ing
li bel	ed	ing	row el	ed	ing	wag on	ed	ing
mar shal	ed	ing	shov el	ed	ing	clos et	ed	ing
par cel	ed	ing	shriv el	ed	ing	riv et	ed	ing
pen cil	ed	ing	tram mcl	ed	ing	lim it	ed	ing
pom mel	ed	ing	trav el	ed	ing	ben e fit	ed	ing
quar rel	ed	ing	tun nel	ed	ing	prof it	ed	ing
rev el	ed	ing	wor ship	ed	ing	buf fet	ed	ing

6. *The name of the agent, when the verb admits of it, is formed in like manner, without doubling the last consonant, as, caviler, worshiper, duelist, libeler, traveler. So also adjectives are formed from these verbs without doubling the last consonant, as, libelous, marvelous.*

7. *When verbs end in c after d and t, the final c in the past tense and participle of the perfect tense, unites with d and forms an additional syllable, but it is dropped before ing. Thus, abate, abated, abating.*

ab di cate	d	ing	de grade	d	ing	cor rode	d	ing
ded i cate	d	ing	suf fo cate	d	ing	de lude	d	ing
med i tate	d	ing	ed u cate	d	ing	in trude	d	ing
im pre cate	d	ing	in vade	d	ing	ex plode	d	ing
vin di cate	d	ing	con cede	d	ing	de ride	d	ing

8. *In verbs ending in c after any other consonant than d and t, the past tense is formed by the addition of d, and this letter with the final e may form a distinct syllable; but usually the e is not sounded. Thus abridged, is pronounced abridjd; abased, abaste. Before ing, e is dropped.*

a base	d	ing	pro nounce	d	ing	crit i cise	d	ing
a bridge	d	ing	man age	d	ing	em bez zle	d	ing
con fine	d	ing	re joice	d	ing	dis o blige	d	ing
com pose	d	ing	cat e chise	d	ing	dis fig ure	d	ing
re fuse	d	ing	com pro mise	d	ing	un der val ue	d	ing

Note. Although ed in the past tense and participle is thus blended with the last syllable of the verb, yet when a noun is formed by adding ness to such participles, the ed becomes a distinct syllable. Thus blessed may be pronounced in one syllable; but bless-ed-ness must be in three.

9. *Verbs ending in ay, oy, ow, ew, and ey, have regular derivatives in ed and ing.*

ar ray	ed	ing	ai loy	ed	ing	re new	ed	ing
al lay	ed	ing	em ploy	ed	ing	con vey	ed	ing
pray	ed	ing	de stroy	ed	ing	fol low	ed	ing
stray	ed	ing	an noy	ed	ing	be stow	ed	ing
de lay	ed	ing	en dow	ed	ing	con voy	ed	ing

But a few monosyllables, as pay, say, and lay, change y into i, as paid, said, laid.

10. *Verbs ending in y, change y into i in the past tense and participle of the perfect, but retain it in the participle of the present tense.*

cry	cried	cry ing	dry	dried	dry ing
de fy	de fied	de fy ing	car ry	car ried	car ry ing
ed i fy	ed i fied	ed i fy ing	mar ry	mar ried	mar ry ing

11. Verbs ending in *y* change this letter to *i* in the second and third persons, and in the word denoting the agent. Thus:

	Solemn Style.		Familiar Style.		Agent.
I cry	thou criest	he crieth	he cries	crier	
I try	thou triest	he trieth	he tries	trier	

Past tense.

I cried	thou criedst	he	we	ye	they	cried
I tried	thou triedst	he	we	ye	they	tried

12. Verbs ending in *ic* change *ic* into *y* when the termination *ing* of the present participle is added, as *die*, *dying*, *lie*, *lying*.

The past tense, and participle of the present, are regular.

died	lied	tied	hied	vied
------	------	------	------	------

Formation of the plural number of nouns.

13. The regular plural of nouns is formed by the addition of *s* to the singular, which letter unites with most consonants in the same syllable, but sounds like *z* after all the consonants except the aspirates *f*, *p*, *q*, *t*, *k*, or *c* with the sound of *k*.

<i>sing.</i>	<i>plu.</i>	<i>sing.</i>	<i>plu.</i>	<i>sing.</i>	<i>plu.</i>
slab	slabs	roll	rolls	strait	straits
lad	lads	ham	hams	post	posts
chief	chiefs	chain	chains	port	ports
bag	bags	crop	crops	sight	sights
back	backs	tear	tears	sign	signs

- a. When the noun ends in *c*, if *s* will coalesce with the preceding consonant, it does not form an additional syllable.

bride	brides	knave	knaves	bone	bones
blade	blades	date	dates	cake	cakes
smile	smiles	note	notes	flame	flames

- b. If *s* will not coalesce with the preceding consonant, it unites with *e*, and forms an additional syllable.

grace	gra ces	maze	ma zes	pledge	pledg es
spice	spi ces	fleece	flee ces	stage	sta ges

14. When nouns end in *ch*, *sh*, *ss*, and *x*, the plural is formed by the addition of *es*.

church	churches	bush	bushes	dress	dresses
peach	peaches	glass	glasses	fox	foxes

15. Nouns ending in *y* after a consonant, form the plural by the changing of *y* into *i*, and the addition of *es*; the termination *ies* being pronounced *ize*, in monosyllables, and *iz* in most other words.

fly	flies	du ty	du ties	fu ry	fu ries

PUNCTUATION.

The *comma* (,) indicates a short pause. The *semicolon* (;) indicates a pause somewhat longer than that of a comma; the *colon* (:) a still longer pause; and the *period* (.) indicates the longest pause. The period is placed at the close of a sentence.

The interrogation point (?) denotes that a question is asked, as, *What do you see?*

An exclamation point (!) denotes wonder, grief, or other emotion.

A parenthesis () includes words not closely connected with the other words of the sentence.

Brackets or hooks [] are sometimes used for nearly the same purpose as the parenthesis, or to include some explanation.

A dash (—) denotes a sudden stop, or a change of subject, and requires a pause, but of no definite length.

A caret (^) shows the omission of a word or letter, which is placed above the line, the caret being put below, thus, *give me ^{the} book.*

An apostrophe (') denotes the omission of a letter or letters, thus, *lov'd, tho't.*

A quotation is indicated by these points " " placed at the beginning and end of the passage.

The index (☞) points to a passage which is to be particularly noticed.

The paragraph (¶) denotes the beginning of a new subject.

The star or asterisk (*), the dagger (†), and other marks (‡, §, ¶), and sometimes letters and figures, are used to refer the reader to notes in the margin.

The diæresis (¨) denotes that the vowel under it is not connected with the preceding vowel.

CAPITAL LETTERS.

A CAPITAL letter should be used at the *beginning* of a sentence. It should begin all proper names of persons, cities, towns, villages, seas, rivers, mountains, lakes, ships, &c. It should begin every line of poetry, a quotation, and often an important word.

The name or appellation of God, *Jehovah, Christ, Messiah, &c.*, should begin with a capital.

The pronoun *I* and interjection *O* are always in capitals.

No. 151.—CLI.

THE LETTER **q** IS EQUIVALENT TO **k**. THE **u** FOLLOWING, AND NOT ITALICIZED, HAS THE SOUND OF **w**; ITALICIZED **u** IS SILENT.

EI AND *IE* WITH THE SOUND OF *E* LONG.

The letters *ei* and *ie* occur in several words with the same sound, that of long *e*, but persons are often at a loss to recollect which of these letters stands first. I have therefore arranged the principal words of these classes in two distinct tables, that pupils may commit them to memory, so that the order may be made as familiar as letters of the alphabet.
